

Conference Technical Specification

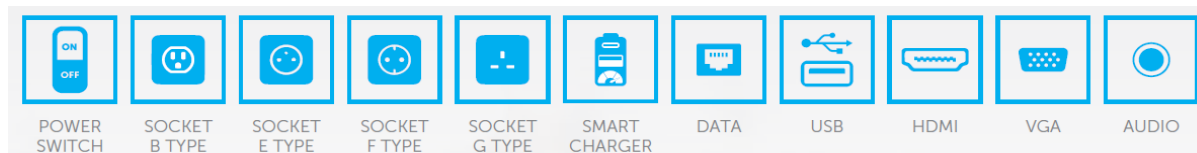

Product description

Conference is an in-desk power module which is easily accessible from both sides. A range of connections are available, including smart charge, data and media, to meet the needs of any modern meeting room.

- Supplied with brushes to prevent dust
- Available in two different dimensions depending on configuration
- Low profile design that allows the lid to close while devices are connected, freeing up valuable workspace
- Ideal for offices, meeting and conference rooms

Power is provided by ABL's OPUS module
